

# More GOLD...

Modification:

Discard bottom four  
XC6VLX and replace  
by XC6VHX (H)

ES silicon of 72-link  
devices expected to  
be available soon  
( $48 \times 6.5 + 24 \times 11$ ) Gb/s

Add multigigabit links in  
zone 2 (equiv. 22300  
bit / BC)

standard Z2 connectors  
have been reported to  
support 10Gb/s
