

Racks, Crates and Cables

Racks and crates

- Do we want a separate rack each side for patch panels?
- Needs a decision on whether we use patch panels or “octopus cables”
- Deflectors for cooled air will be riveted in: we need to decide on exact crate locations within racks soon!

Cables

- No work on cabling document since the summer (due last April!)
- Bill Cleland offered (last November) to update our spreadsheets with his corrections – so far we have received nothing back
- Chris Parkmans wants details of cables within USA15 for his database – book space in cable trays
- Do we have enough short cables within USA15 (for patch panels and/or octopi)?
